Subject: Pardee Homes of Nevada TC 44/50 #3
Review of Condition for SDR 12110

Dear Gary:

On behalf of our client, Pardee Homes of Nevada, we respectfully request review and approval of the attached application for a Review of Condition. The site is generally located at the northeast corner of Dorrell Lane and Tee Pee Lane, and consists of approximately 1.26 acres. A total of six single-family homes are planned for this site, resulting in a density of 4.76 dwelling units per acre.

SDR-12110 was approved by City Council on May 17, 2006. It has come to our attention that condition number seven does not accurately describe the front setback as is depicted on the site plan that was approved by City Council.

The condition reads "The setbacks for this development shall be a minimum of 10 feet to the front of the house, 22 feet to the front of the garage as measured from the back of the pedestrian access easement, five feet on the side, ten feet on the corner side, and 10 feet in the rear". We respectfully request this condition be modified to read "The setbacks for this development shall be a minimum of 10 feet to the front of the house, 22 feet to the front of the garage as measured from the back of curb, five feet on the side, ten feet on the corner side, and 10 feet in the rear."

Sidewalk
The measurement of this front setback describes the setback as depicted on the approved site plan. The setback measurement and street section from property line to structure and street section s typical of those previously approved for similar projects within Town Center.

We anticipate this item be heard by City Council July 19, 2006, as the corresponding Tentative Map is planned for submittal to be heard on the July 27th Planning Commission agenda. It is our understanding that this Review of condition does not require a hearing before the Planning Commission.

Please contact our office if you have any questions or if you require further information. Thank you for your consideration of this matter.

Very truly yours,

Barbara Baird
